

## Non-Flammable Water based Splice Prep and Equipment Maintenance Kit

**HT-FPC-KTFS1**

### Application/Product Description

The Non-Flammable Kit contains the cleaning supplies necessary for splice preparation & maintenance. The Transportable Water Based Fibre Optic Cleaning Kit contains two Fibre Cleaning Liquid (Non-Combustible/Aqueous) 100ml liquids and Lint-Free Wipes to perform the Combination Cleaning process.

Use the swabs and wipes with the Fibre Cleaning Liquid to clean the fusion splicer, especially the mirror and V-groove. Swabs are also included for cleaning ferrules, alignment sleeves and backplane connections. HT-FPC-WW Fusion Splicer Wet Wipes are included for tool, cable and fibre preparation.

The swabs are packaged in rugged tubes for field operations. The kit bags are made from tough nylon for long life.

### Features and Benefits

- Non-flammable aqueous cleaner
  - Removes a broad range of soil; dust, oils, soils, complex soils, salts and other contaminants
  - Dissipates static charge, which can attract airborne contaminants
  - Compatible for all fibre optic connectors
- Fibre Cleaning Dry Wipes - 100 Wipes
  - Excellent solvent resistance
  - Excellent particle entrapment
  - High absorbency capacity and rate
  - Low linting
  - Excellent durability
