

End Face Pen - Non-Combustable/Aqueous - 5g

HT-FPC-PNNCA

Application/Product Description

The Non-Combustable/Aqueous End Face Pen contains a nonflammable, water-based cleaning solution that quickly and safely cleans the end face of fibre optic connectors, splices and ribbons. It also dissipates static charge, which prevents attracting airborne contamination that cling to the end face surface.

The cleaning formulation has low odour, is plastic safe, and residue free. Because it is water-based, it has the environmental benefits of low VOC and GWP (Global Warming Potential). This non-pressurized container can be easily and safely transported. For best results, use with the End Face Dry Wipe Cube Platform or End Face Click Cleaner Tool and the Combination Cleaning process.
