

CFN Anchor Kits

B and R Port Anchor Kits

Application Information

The HellermannTyton CFNIR R and B port anchor kits have been designed to fix the strength member within the cable to reduce any undue stress on the fibre cables that may effect the optical performance.

Features & Benefits

- Provides strain relief to fibre optic cables
- Can be used with solid or stranded strength members
- Simple installation by clamping the strength member
- Suitable for use with CFNIR closure

B Port Anchor Kit

The B port anchor kit consists of a single bracket and fixing kit to manage a single fibre cable and is supplied in packs of 2.

R Port Anchor Kit

The R port anchor kit consists of a single bracket and 4 fixing kits to manage a maximum of 4 cables per bracket. The R port anchor kit is supplied in packs of 6.

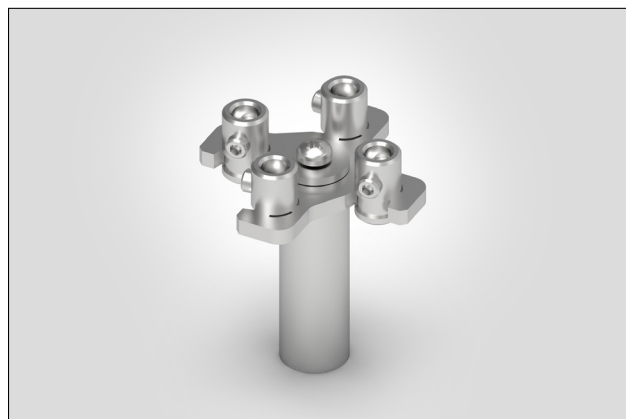

B Port Anchor Kit mounted onto a base.
