

## On Course for Cat6A Training

HellermannTyton have introduced the Category 6A practitioner training course to their highly regarded portfolio of training courses.

Following the launch of Deca<sup>10</sup>, HellermannTyton's comprehensive copper and fibre range to support 10G, the demand for a Cat6A training course has been exceptionally high. The new course has been designed to meet this demand and, upon completion, provides System Installers

with the knowledge and skills to complete a high quality Cat6A installation and the accreditation needed to offer HellermannTyton's 25 year Network Sciences system warranty.

The course agenda for delegates offers a balance of theory and practical training, covering a range of topic areas including: the needs for a 10G solution; applicable TIA/EIA and ISO cabling standards; the relative benefits of shielded versus unshielded systems; best practice installation procedures; alien cross talk and how to test for it; field testing and fault finding.

Ewan Wilson, Managing Director comments "I am pleased that we have introduced the Category 6A practitioner course in response to the high level of interest in Cat6A shown by our customer base. The course is designed to address the uncertainties and concerns that many installers have expressed in relation to this new technology. It is a great addition to our existing Cat6 and fibre training programmes."

As with all HellermannTyton training courses, the Cat6A course is recognised by BICSI and will carry BICSI credits (CEC's) on completion of the course for all registered RCDD's, Installers and Technicians.

**About HellermannTyton**

Founded in 1988, HellermannTyton Data Ltd is an established leader in the design, development and manufacture of innovative network infrastructure solutions for both LAN and WAN environments. The company offers a broad range of quality, high performance structured cabling products including Deca<sup>10</sup>; the unique pre-terminated, 'plug & play' RapidNet<sup>TM</sup> system; iD intelligent infrastructure management; and a full range of market leading closures for Broadband applications incorporating the patented Cablelok<sup>TM</sup> mechanical seal. Based in Northampton, the company is part of the global HellermannTyton group with operations in 34 countries worldwide. For more information visit [www.htdata.co.uk](http://www.htdata.co.uk)
