

August 2009, Northampton, UK

HellermannTyton has refined the Deca¹⁰ hand tool to give installers an even smoother, easy to use tool which terminates and crops in a single action.

The Cat6A keystone tool is required to terminate the cable within the Deca¹⁰ keystone. The tool is simple to use, terminating and trimming the 8 cores in one single action, ensuring fast, high quality, repeatable terminations.

The tool has a soft grip, ergonomic spring loaded handle, providing a smooth and comfortable action and has changeable blades for extended service life.

Deca¹⁰ is the new 10g product range from HellermannTyton offering Cat6A and Fibre products in both field terminated solutions and RapidNet™.

The new termination tool can be seen in action online at: www.htdata.co.uk/animations.aspx

About HellermannTyton

Founded in 1988, HellermannTyton Data Ltd is an established leader in the design, development and manufacture of innovative network infrastructure solutions for both LAN and WAN environments. The company offers a broad range of quality, high performance structured cabling products including Deca¹⁰; the unique pre-terminated, 'plug & play' RapidNet™ system; iD intelligent infrastructure management; and a full range of market leading closures for Broadband applications incorporating the patented Cablelok™ mechanical seal. Based in Northampton, the company is part of the global HellermannTyton group with operations in 34 countries worldwide. For more information visit www.htdata.co.uk
