Effortless Setup

The new tool-free coupler is a key component of HellermannTyton's GigaDuct System. Its defining feature is the ability to connect sections of ducting and fittings without the need for any tools, significantly streamlining installation.

Simply prepare the raceway sections, position the coupler, and connect the sections until you hear a secure click. Need to reconfigure? Just disengage the tabs - no tools required.

Express Waterfall Outlet

An innovative solution designed to manage the critical transition of fibre optic cables, that can be fitted as part of new installations, or to existing systems at any point in the future.

Key features and benefits:

- Protects optical fibre
- Flexible and adaptable
- Tool-free installation
- Optimal cable management
- Safe and compliant
