

## Cable Tie Cutter

The Cable Tie Cutter from HellermannTyton has been designed to remove cable ties from bundles of cables or cables fixed to certain areas without risking any damage to the cable itself.

The 'hooked nose' on the cable tie cutter tool allows the cutting blades to get between the cable and the cable tie and safely cut through the cable tie without marking or damaging the cable.

The cable tie is small and ergonomically designed allowing the user to get into the tightest of areas in order to remove cable ties and potentially other types of cable fixings.

### Features and Benefits

- Hooked Nose allows clean safe cutting of cable ties.
- Ergonomically designed with soft grip rubberised grip.
- Small size allows access into tight areas
- Locks into closed position for safe handling
- Spring handle for easier repetitive use
