

# RapidNet Rear Cable Management Panel

**HellermannTyton's RapidNet panel with rear cable management** provides support and protection for MTP backbone and fibre cables within a cabinet or patching frame.

## Security and Protection

Part of HellermannTyton's industry leading pre-terminated RapidNet system, the panel has been designed for use within the data centre to support and protect MTP cables from the rear of the pre-terminated cassettes through the rack to the main cable routes, either overhead or under the floor.

## Flexibility

A range of fixing points are provided in the rear of the panel to secure cables and provide strain relief for the MTP connectors and adapters. 25mm conduit (available as kits) then supports and protects the cables from the panel to the horizontal cable routes. Multiple rear entry points are provided for the conduit tubing to enable maximum flexibility.

## Versatility

The panel can also be used with the RapidNet direct terminated fibre solution, RapidNet MTP VHD or UTP copper RapidNet cassettes, providing additional rear cable management and enabling a "mix and match" approach between copper and fibre. This can be particularly useful where space is at a premium or where only a limited number of fibre connections are required.

## Features and Benefits

- Accommodates 4 standard RapidNet cassettes
- Up to 96 LC connectors in 1U
- Up to 576 fibres in 1U using RapidNet MTP VHD
- Dual label fields with magnifying lenses
- Supported rear MTP backbone cables
- Multiple cable fixing locations
- Rear fibre management and protection
