

To Whom It May Concern: RoHS and WEEE Directives – HellermannTyton Statement

Waste Electrical Electronic Equipment Directive, 2012/19 / EU.

Under the UK Statute Instrument - Waste Electrical and Electronic Equipment (WEEE) Regulations - HellermannTyton Data products are not required to comply with the requirements of the WEEE regulations. The company supplies passive fibre optic products and therefore not items of EEE. WEEE regulations are not applicable to the range of products produced.

The company is not a “producer” of EEE and reports a zero entry for group registration. A Due Diligence Documented Record is on file declaring reasons why the company is not an EEE producer.

Restrictions on the Use of Certain Hazardous Substances in Electrical & Electronic Equipment Regulations, RoHS 2 (EU Directive 2011/65) / RoHS 3 (EU Directive 2015/863)

As an ISO 14001 certified, responsible and environmentally aware manufacturer, all HellermannTyton Data’s products meet the requirements of the RoHS regulations.

A survey has been carried out on all the company’s suppliers to assess that, components built into HellermannTyton Data products, themselves are compliant with RoHS regulations. Continued compliance is achieved by current purchase order requirements.

The company has reviewed its existing products and has appropriate control procedures for new products at the design stage.

Changes to RoHS are routinely reviewed and the company is currently valid for the additions of Directive 2015 / 863 / EU, RoHS 3, introduced from July 2019, and the changes that resulted from “RoHS recast” – Directive 2011 / 65 / EU, RoHS 2, introduced as a UK statute instrument - UK Restriction of the use of certain Hazardous Substances in Electrical and Electronic Equipment (RoHS) Regulations 2012 (as amended), on the 2nd January, 2013.

HellermannTyton Data takes its responsibilities to meet existing and future, environmental statutory legislation seriously. We manage this responsibility through our 3rd party (BSI) assessed ISO 14001 Environmental Management System.
